PROFESSIONAL EXPERIENCE **Software Engineer**

ThePeach Inc.

Daejeon, Korea

Aug 2020 – Feb 2025

Designed and implemented UAV systems, including autopilots, ground control stations, and payload systems.

Collaborated with multiple UAV companies to develop software solutions for autopilot control, ground control stations, and payload management.

- using PX4, MAVLink, ROS/ROS 2, and QGroundControl.
- Contributed to the PX4 and ArduPilot open-source projects.
- Provided technical guidance on UAV system design and novel applications of drone technology.

EDUCATION **Chungnam National University**

B.S. in Mechatronics Engineering

Daejeon, Korea

Expected 2028

- Studied a wide range of topics in robotics, control systems, embedded systems, mechanical engineering, electronics, and computer science.

Daedeok Software Meister High School

High School Diploma in Embedded Software

Daejeon, Korea

2020

- Studied embedded systems, computer programming, electronics, and software engineering with a focus on embedded software development.

SKILLS

Languages

- Advanced in C, C++
- Competent in Python, Bash

Robotics & UAV

- Advanced in PX4, ArduPilot
- Proficient in ROS/ROS2, MAVLink, DDS

Embedded

- Proficient in ARM Cortex-M, STM32
- Competent in DSP, nRF9160

Operating Systems & RTOS

- Competent in Linux, NuttX, Zephyr RTOS

Tools

- VS Code, Git, MATLAB
